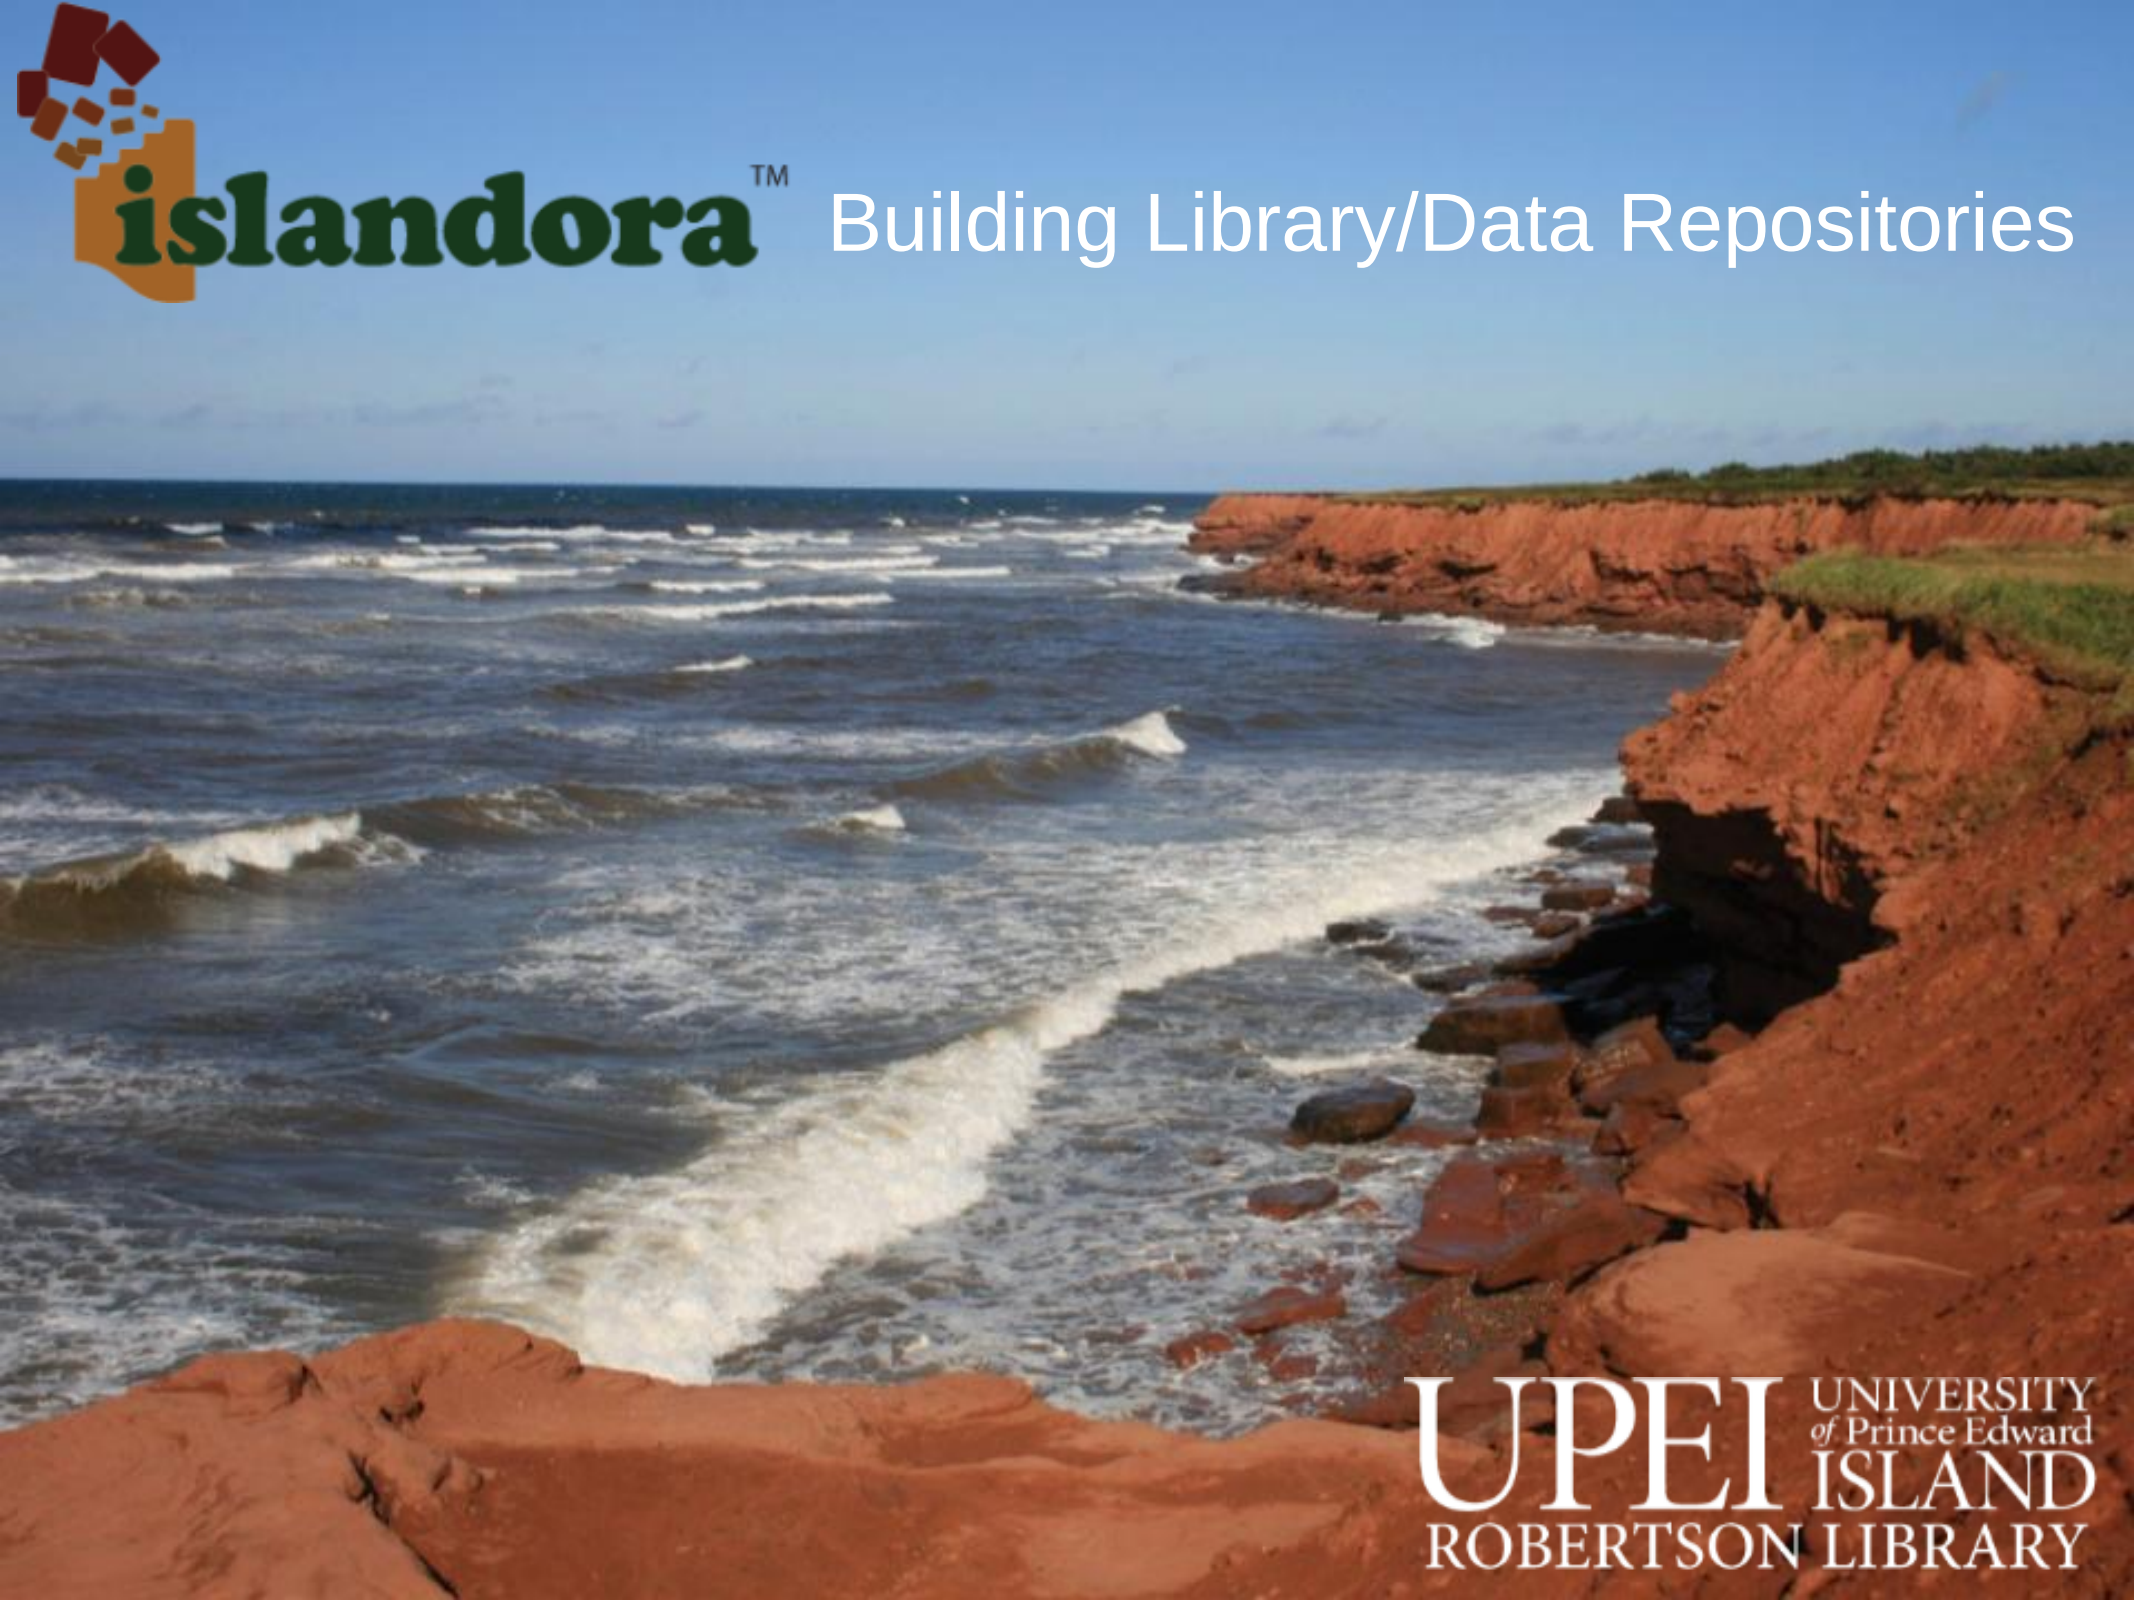
islandora™ Building Library/Data Repositories



UPEI University of Prince Edward Island
ROBERTSON LIBRARY

- Introductions

Learning Objectives

Understanding of:

- Islandora project community (including how to participate)
- core architectural elements of Islandora/Fedora including content models and digital objects

Ability to:

- Log in, create pages, and manage personal account on an Islandora site
- Build an Islandora collection
- Ingest image and pdf items into the collection

Roadmap

- **Introduction** to Islandora
  - Genesis
  - Platform (Fedora/Drupal/Solr)
  - Functionality
  - Community
- **Drop of Drupal** (logging in to test.cairnrepo.org)
- *Break (15 min)*
- **Working** in a repo
- Questions/Play/Installing a Virtual Image
- **Conclusion** – where to go for more information.

INTRODUCTION TO ISLANDORA

islandora™ @UPEI

- Started in 2008 – DAM system
- **Operational** and Soft Money
  - 2.3 million dollar grant
  - Research & Other grants over $750,000

System designed to support any Digital Asset Requirement

Viburnum nudum

Common Name: Withe-Rod

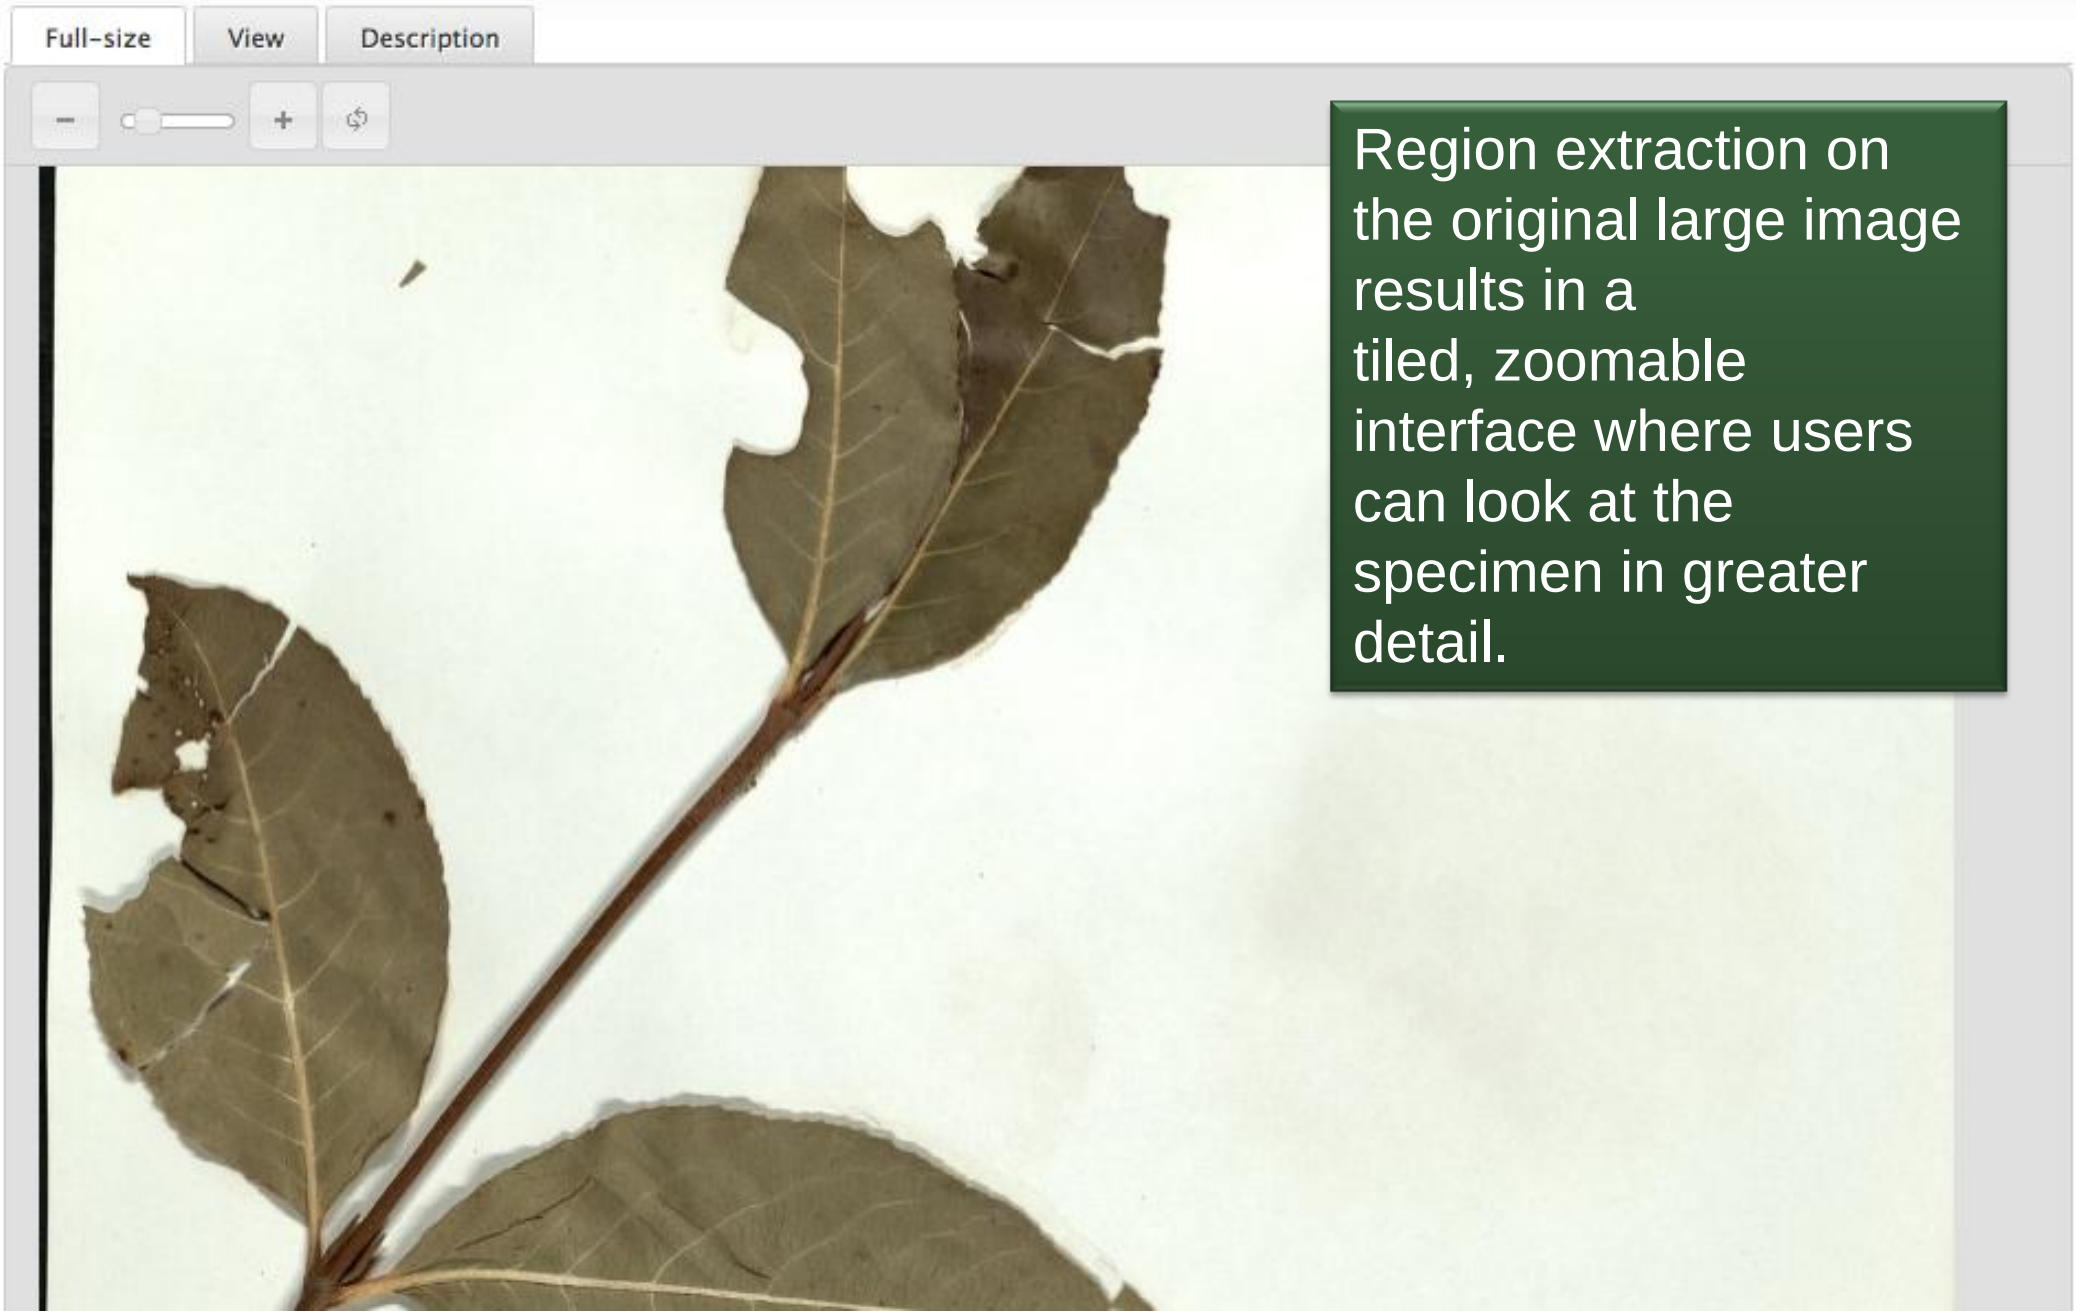
View the specimen.

Collected in: Cherry Hill

Collected by: Paul Phelan

Date: 13/10/77

Each specimen is geo-referenced and plotted on a map



Region extraction on the original large image results in a tiled, zoomable interface where users can look at the specimen in greater detail.

Kerr Research Group

The Marine Natural Products Group at the University of Prince Edward Island is engaged in projects directed at the development of sustainable production methods of bioactive marine metabolites and discovering new bioactive bioproducts. The latter group includes metabolites with activities in assays of relevance to human and animal health, and with activity as antifouling agents.

Welcome

The Island Imagined is an online collection of historic maps of Prince Edward Island. The collection features maps, atlases, books, images, and documents from the Prince Edward Island Public Archives and Records Office, the Prince Edward Island Museum and Heritage Foundation, and the Robertson Library at the University of Prince Edward Island. The Island Imagined contains over 1,000 maps including an early map of the region circa 1574 attributed to Giacomo Gastaldi and features a digitized version of Meacham's Atlas from 1880.

Preserving PEI's community histories

Made possible through a generous private donation, IslandLives contains community and church histories and it builds on the Robertson Library's mission to preserve and share unique material relating to Prince Edward Island and demonstrates UPEI's ongoing commitment to making PEI's cultural and published heritage available to all. Welcome.

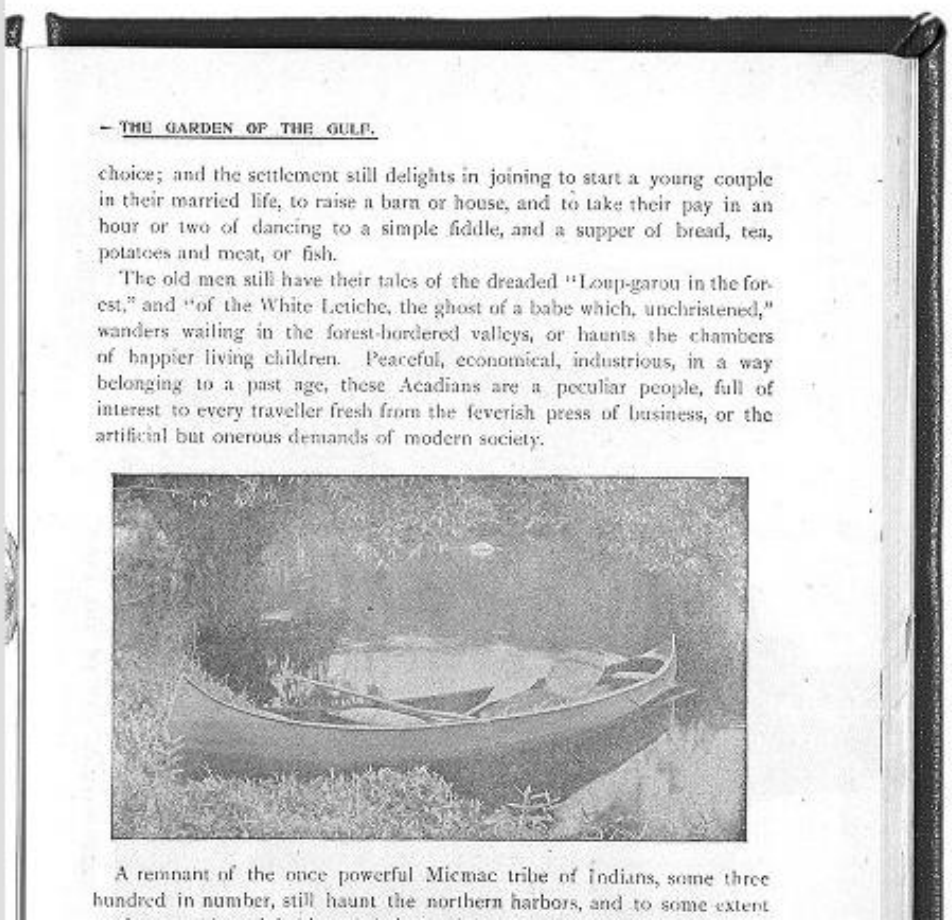
Page 3 – Prince Edward Island as a summer resort: where is is and how to get there



– THE GARDEN OF THE GULF.

choice; and the settlement still delights in joining to start a young couple in their married life, to raise a barn or house, and to take their pay in an hour or two of dancing to a simple fiddle, and a supper of bread, tea, potatoes and meat, or fish.

The old men still have their tales of the dreaded "Loup-garou in the forest," and "of the White Letiche, the ghost of a babe which, unchristened," wanders wailing in the forest-bordered valleys, or haunts the chambers of happier living children. Peaceful, economical, industrious, in a way belonging to a past age, these Acadians are a peculiar people, full of interest to every traveller fresh from the feverish press of business, or the artificial but onerous demands of modern society.

A remnant of the once powerful Micmac tribe of Indians, some three hundred in number, still haunt the northern harbors, and to some extent

choice; and the settlement still delights in joining to start a young couple in their married life, to raise a barn or house, and to take their pay in an hour or two of dancing to a simple .fiddle, and a supper of bread, tea, potatoes and meat, or fish.

The old men still have their tales of the dreaded "Loup-garou in the for¬ est," and uof the White Letiche, the ghost of a babe which, unchristened," wanders wailing in the forest-bordered valleys, or haunts the chambers of happier living children. Peaceful, economical, industrious, in a way belonging to a past age, these Acadians are a peculiar people, full of interest to every traveller fresh from the feverish press of business, or the artificial but onerous demands of modern society.

A remnant of the once powerful Micmac tribe of Indians, some three hundred in number, still haunt the northern harbors, and to some extent retain the garb and habits of their warlike ancestors Many of the men still wear the moccasin, use the waghon, or Indian knife, prefer the quetan, or bark canoe to the white man's boat, and love to talk among themselves of the great days of the past, and the coming of the Indian Messiah. They are keen hunters, and faithful servitors for moderate pay, and a few days with one of them, among the trout, duck and plover, is generally a time to be long and pleasantly remembered.

remedy but to wait three years, the magistrates meantime resuming their jurisdiction. He then proceeded thus, "If a trade in the country is permitted by law, that trade has a right to be defended by law. The trade of the licensed victualler and of the sellers of alcholic drinks is a trade that has been and is now permitted, and I think Parliament and the law are not justified in inflicting on that trade unnecessary difficulties and irritation. . . . It has a right to demand that it should not be subjected to passionate and hasty legislation."

The speaker then proceeded to state that Manchester and Birmingham with a population of 400,000 each had 4,000 licensed houses, affording a livelihood to 4,000 families, but in the bill presented to Parliament there was no "consideration of the interests of those families, there was no valuation provided, there was no compensation offered or suggested, . . . and the publicans and victuallors wherever you got a majority were to be exterminated as if they were vermin." Referring to a letter he had written in 1878 to a York correspondent, he said that there was "no hope of Parliamentary progress on this question as long as the Permissive Bill blocked the way." After explaining the advice he gave to a committee of "the Alliance" and its successful issue, he proceeded thus: "What all temperance reformers should now consider is some plan which will unite the temperance feeling of the country, give it power, and make its advance and progress possible." Then speaking of what had been done elsewhere in the State of Maine, where they had legislated in the most drastic style with a view of suppressing intemperance by act of their State legislature, he stated on the authority of some one usual, whose name he did not mention, that in thirty years they had forty attempts at

the spirit is love, joy, peace, long-suffering, goodness, faith, meekness, temperance;" and the reverse side, the works of the flesh are these: "Envyings, murders, drunkenness, revelling" and such like. Which of all these vices so prevalent, so ruinous as intemperance? and could any of these virtues exist without temperance? Shall we then grow weary of this part of our Christian work? No! no! rather let us toil on, even though the work may be distasteful, and the discouragements be very great. "We are soldiers enlisted to fight against the wrong;" we must expect to endure hardships, but we are on the Lord's side, and we know that His cause must prevail. Doubtless there are some Christian people who tire of them because they feel that they have no personal interest in the matter. This may be true of the present, but can anyone be sure of anything in the future? Mother, has this subject no interest for you? Is there no darling boy in the home circle toward whose future you are looking with such fond anticipation? Are you sure, "as the years go by," and he goes forth from your tender care, that he will be able to resist the temptations of the saloon? Oh, wife! as you lean so securely upon that husband, are you sure that in an evil hour he may not yield to the temptation? Have you, then, no interest in this matter?

THE third page of the Toronto *Daily Mail* is noted for "Want" advertisements. If you want a situation, a mechanic, a business, machinery, lodging, if you have lost or found anything, or if you want to find out where anyone is, advertise in the Toronto *Daily Mail* and read the advertisements on the third page of that paper. The charge is two cents a word for each insertion, or ten cents a word for six insertions. Address *The Mail*, Toronto, Canada.

What is Island Voices?

The first phase of Island Voices (2010 – 2011) is a project focussing on the digtization of one of Prince Edward Island's most important collections of folklore and oral history field recordings, the Reg "Dutch" Thompson archive. Future phases of the project will develop a more comprehensive online archive of PEI spoken word and music recordings.

Abstract

Finfish nodaviruses (betanodaviruses) can cause highly destructive infections in numerous species of farmed marine fish larvae and juveniles worldwide. The betanodavirus genome consists of two single-stranded positive-sense RNA molecules

VREs (Virtual Research Environments)

The Robertson Library's VRE (or Virtual Research Environment) services bring cutting-edge, web-based research and collaboration tools to UPEI researchers and administrative groups. Currently, the Robertson Library maintains over 150 VREs built on our homegrown, open-source Islandora software, which leverages the experience and ability of an international community of users and developers.

The VREs extend Robertson Library's commitment to the principles of open and accessible information for the betterment of local, national, and international community of learning and teaching. For this reason, acccess to our source code is unrestricted. Whoever would benefit or chooses to contribute to the software has access. We also expect that UPEI Faculty and Staff taking advantage of the VRE services will make their research and collections available to the public where it is appropriate.

*** Note:** If you are a member of the PEI community working on the development of a community project (without a Primary Investigator/Project Manager that is a Faculty Member at UPEI) please find out more about how UPEI processes these requests, and submit the application found on this page.

Frequently Asked Questions

What is a VRE?

As the research process grows increasingly complex, VREs or Virtual Research Environments provide tools for creating, manipulating, and sharing data, as well as keeping it safe. This means that VREs provide a number of web-based tools to support research projects within and across organizations, disciplines, and geographic boundaries. VREs may be private to a group, or contain some publicly available information. VREs at UPEI are also being used to house digitized community collections, as well as financial and administrative documents. VREs are also developed to facilitate planning and registration for conferences, and events. Here is a page with links to some of UPEIs VREs.

Who may get a VRE?

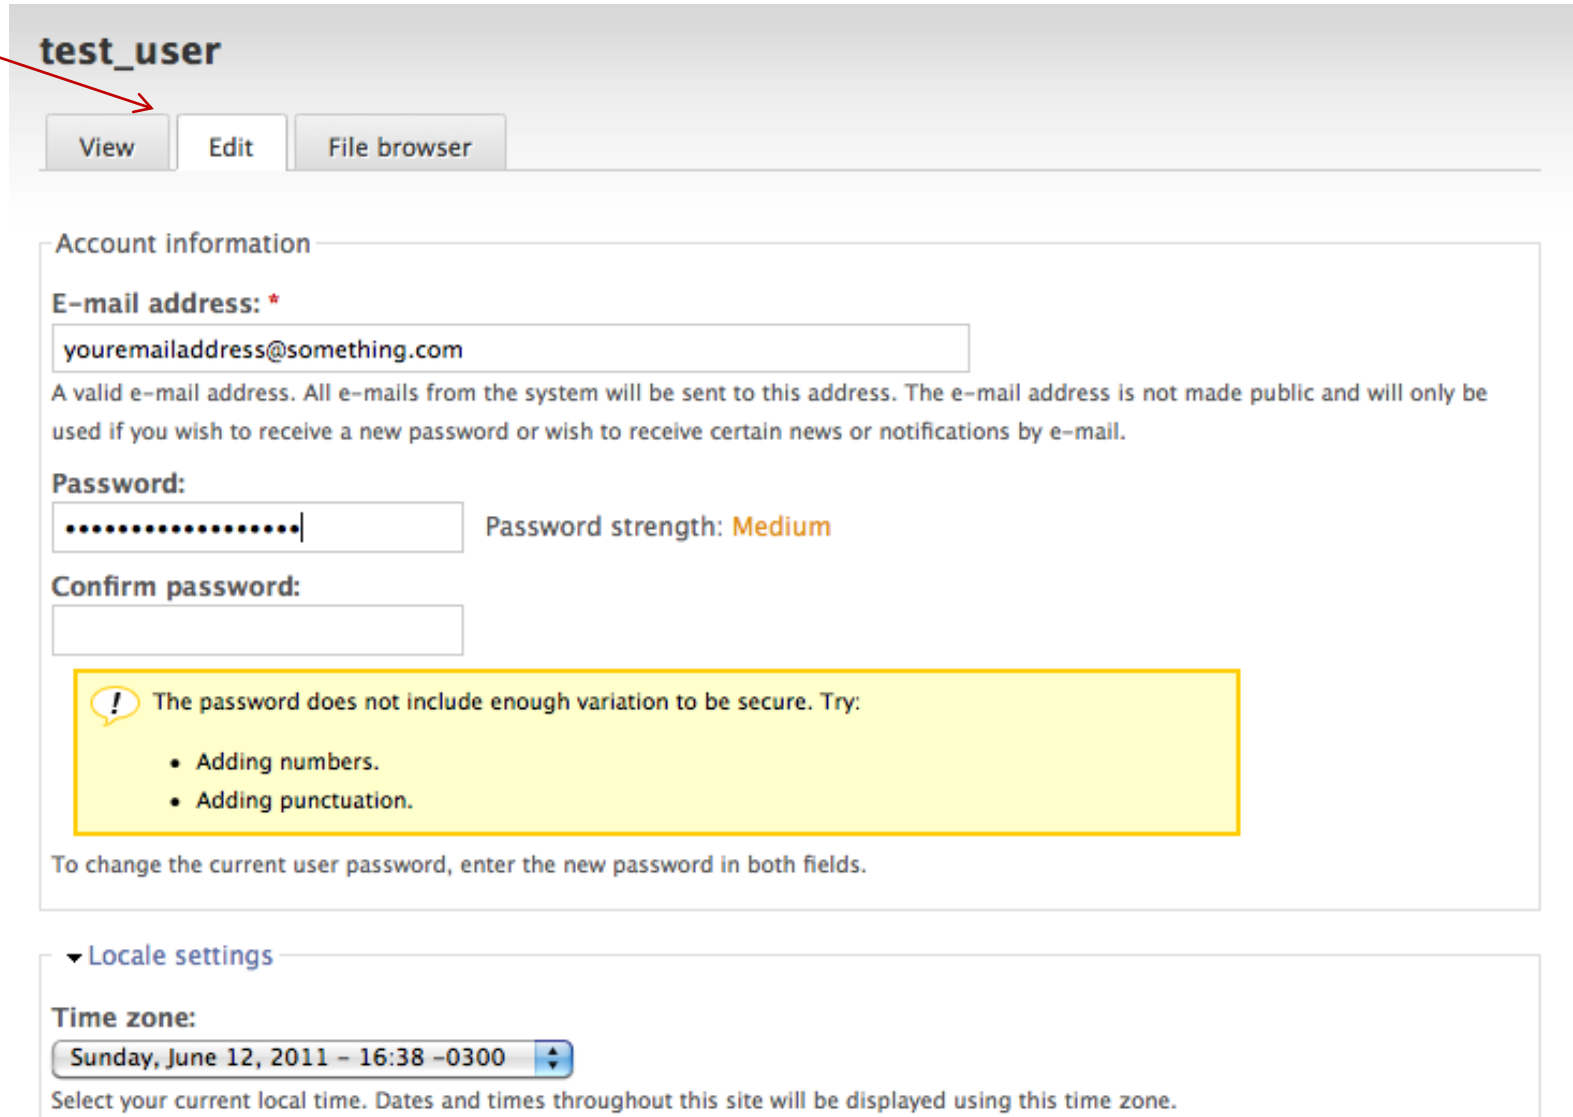
Two tasks before break:
•Change your account information
•Create a page to promote your collection

Change your Account Information

- Select “My Account”
- Select “Edit tab”
- Then,

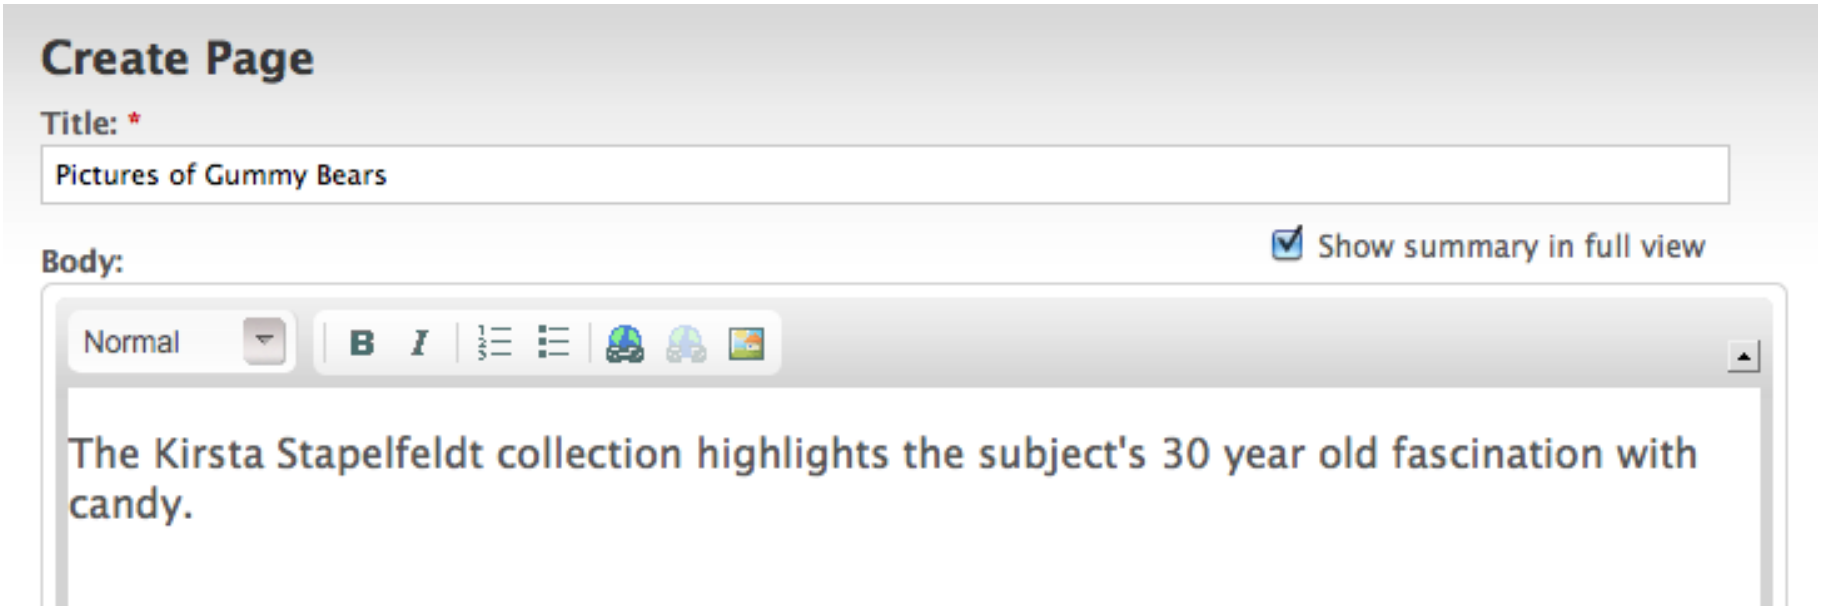
Save



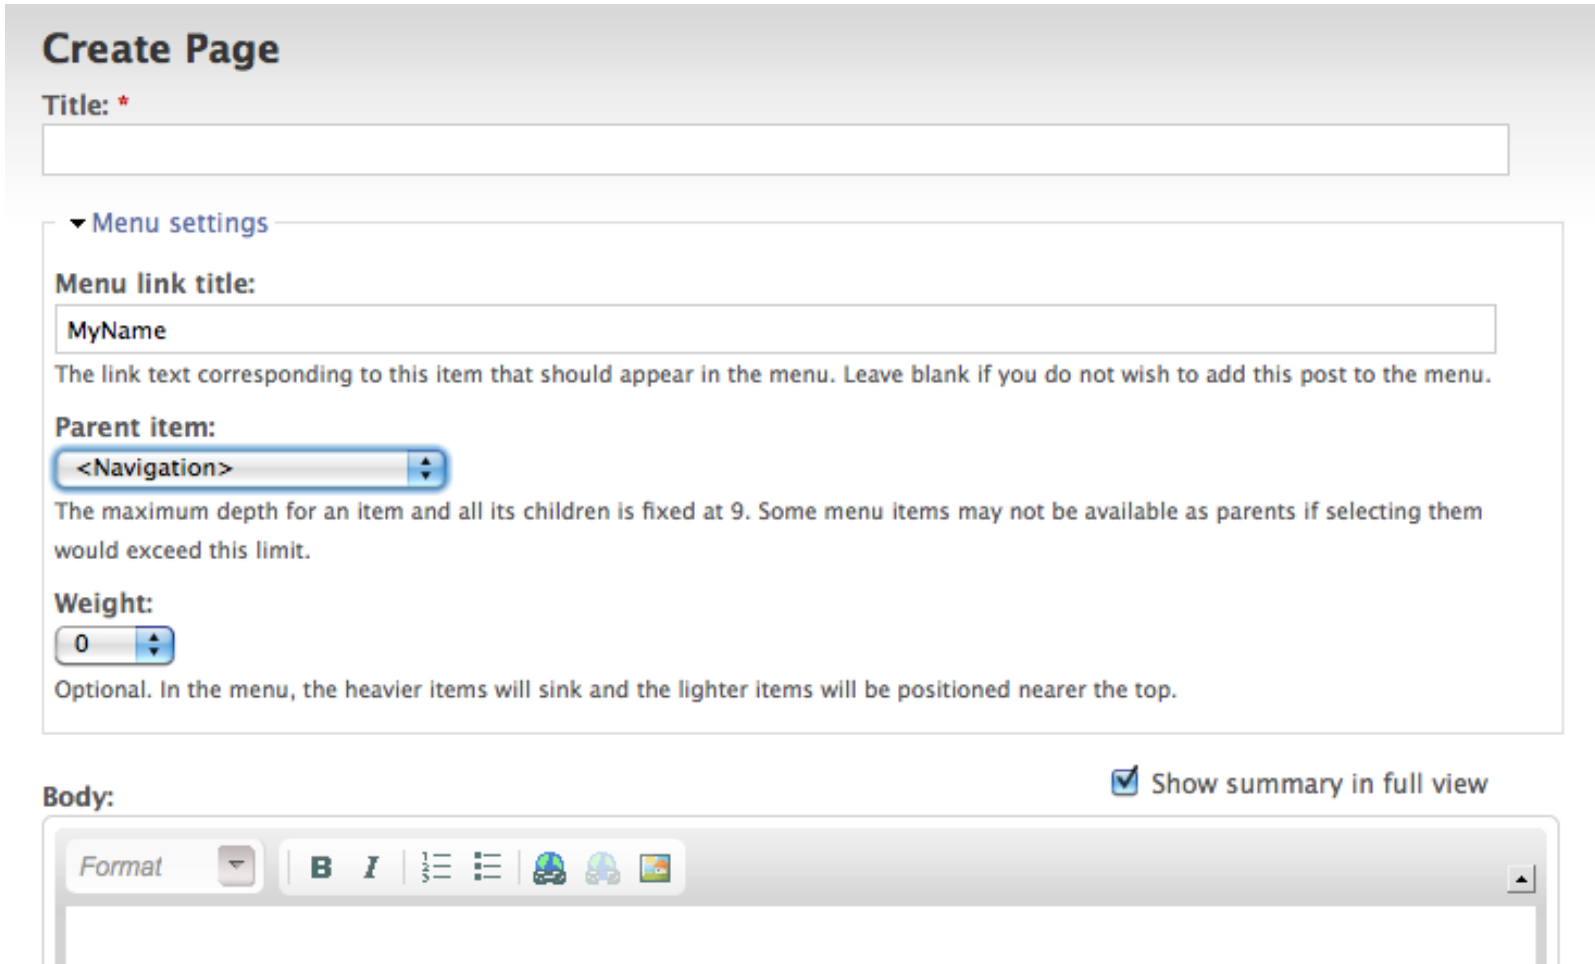
Create a Page to Promote your Collection

- Select “Create Content”
- Select “Page”

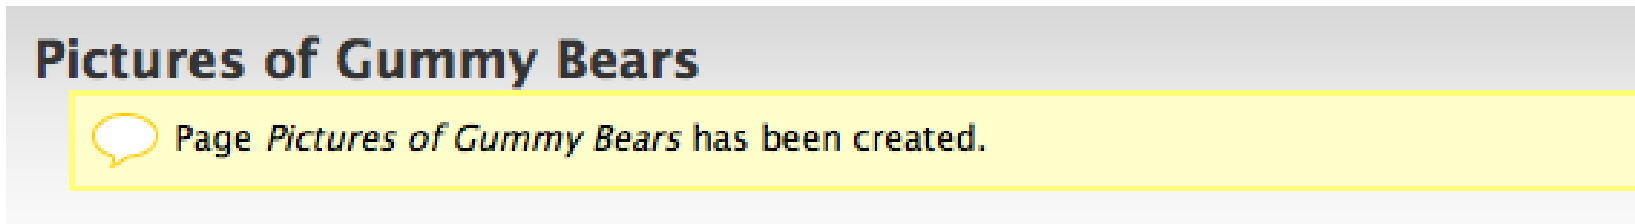
Give your Page a Title and write some content…



Click “Menu Settings” and give your title a page you will recognize. Set the parent item to “Navigation”



…Then Save



You should see the message above, and

A link should now appear in the left-hand menu.

Break!

Working in a Repo

Islandora's Modules

- Fedora Repository

Enabled	Name	Version	Description
☑	Digital Repository	6.1dev	Shows a list of items in a fedora collection. Depends on: ImageAPI (enabled), Tabs (enabled) Required by: Fedora Attach (disabled), Islandora Book (enabled), Fedora ImageAPI (enabled), Islandora Content Modeler (enabled), Islandora Form Builder (enabled), Islandora Form Builder Elements (enabled), Islandora Form Elements (disabled), Islandora Newspaper (disabled), Islandora Solr Search (enabled), PID Field (enabled), Islandora Solr Sample Configuration (enabled)
☐	Fedora Attach	6.1dev	Allows users to attach files to node content which then get ingested into Fedora. Depends on: Digital Repository (enabled), Upload (disabled), ImageAPI (enabled), Tabs (enabled)
☑	Fedora ImageAPI	6.1dev	Adds image manipulation support through a REST interface Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)
☑	Islandora Book	6.1dev	Provides book interface Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)
☑	Islandora Content Modeler		Allows you to manage and build content models for Islandora/Fedora. Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled) Required by: Islandora Form Builder (enabled)
☑	Islandora Form Builder		Generates Forms used to create or edit Fedora Objects meta data. Depends on: Digital Repository (enabled), Islandora Content Modeler (enabled), Islandora Form Builder Elements (enabled), ImageAPI (enabled), Tabs (enabled)
☑	Islandora Form Builder Elements	6.1dev	Adds a set of form elements that extend/modify the drupal form elements available to Islandora Form Builder. Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled) Required by: Islandora Form Builder (enabled)
☐	Islandora Form Elements	6.1dev	Adds a set of form elements that extend/modify the drupal form elements available to the Ingest forms. Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)
☐	Islandora Newspaper	6.1dev	Content models and support code for Newspapers Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)
☑	Islandora Solr Sample Configuration	6.1dev	Customizes Islandora solr search Depends on: Islandora Solr Search (enabled), Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)
☑	Islandora Solr Search	6.1dev	searches a solr index Depends on: Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled) Required by: Islandora Solr Sample Configuration (enabled)
☑	PID Field		Defines a field type for referencing a Fedora item from a node. Depends on: Content (enabled), Digital Repository (enabled), ImageAPI (enabled), Tabs (enabled)

Roadmap

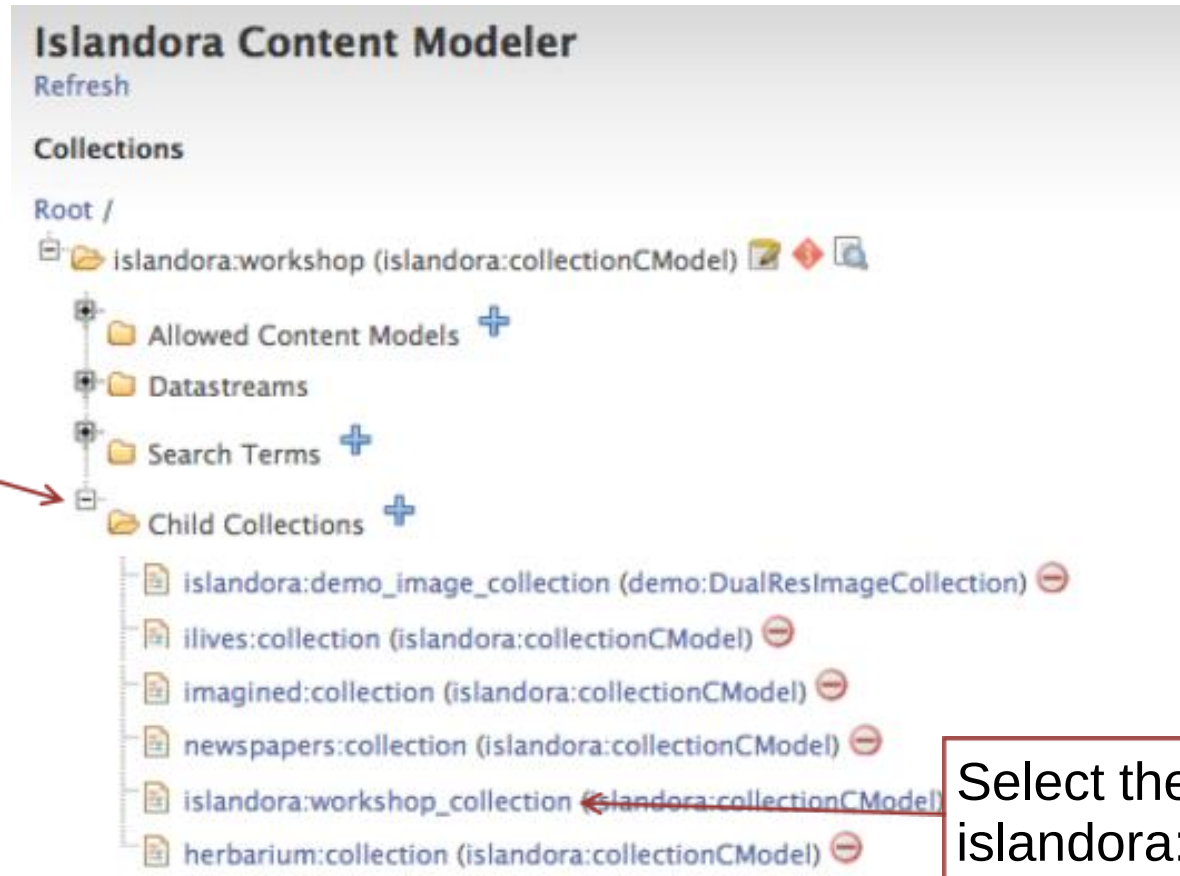
- **Introduction** to Islandora
  - Genesis
  - Platform (Fedora/Drupal/Solr)
  - Functionality
  - Community
- **Drop of Drupal** (logging in to test.cairnrepo.org)
- *Break (15 min)*
- **Working** in a repo
- Questions/Play/Installing a Virtual Image
- **Conclusion** – where to go for more information.

Roadmap

- **Working** in a repo
  - Creating collections
  - Create an image collection
  - Create a PDF collection
- Questions/Play/Installing a Virtual Image
- **Conclusion** – where to go for more information.

Adding a Child Collection using the Islandora Content Modeler Module

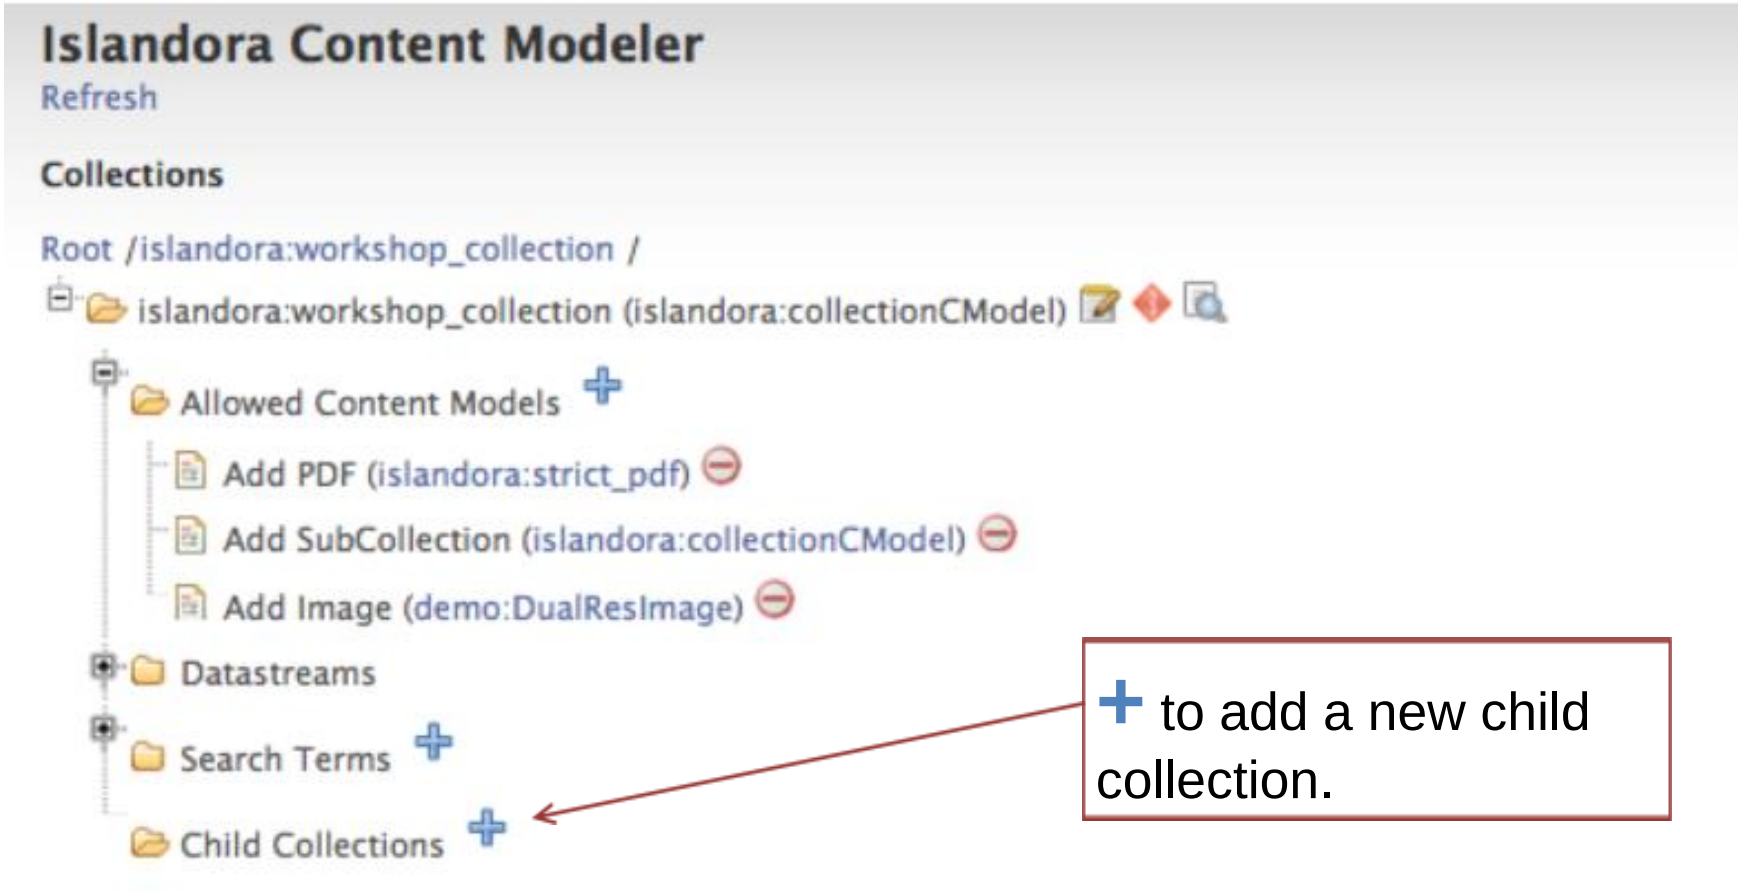
http://test.cairnrepo.org/admin/content/modeler



Click on **+** to expand

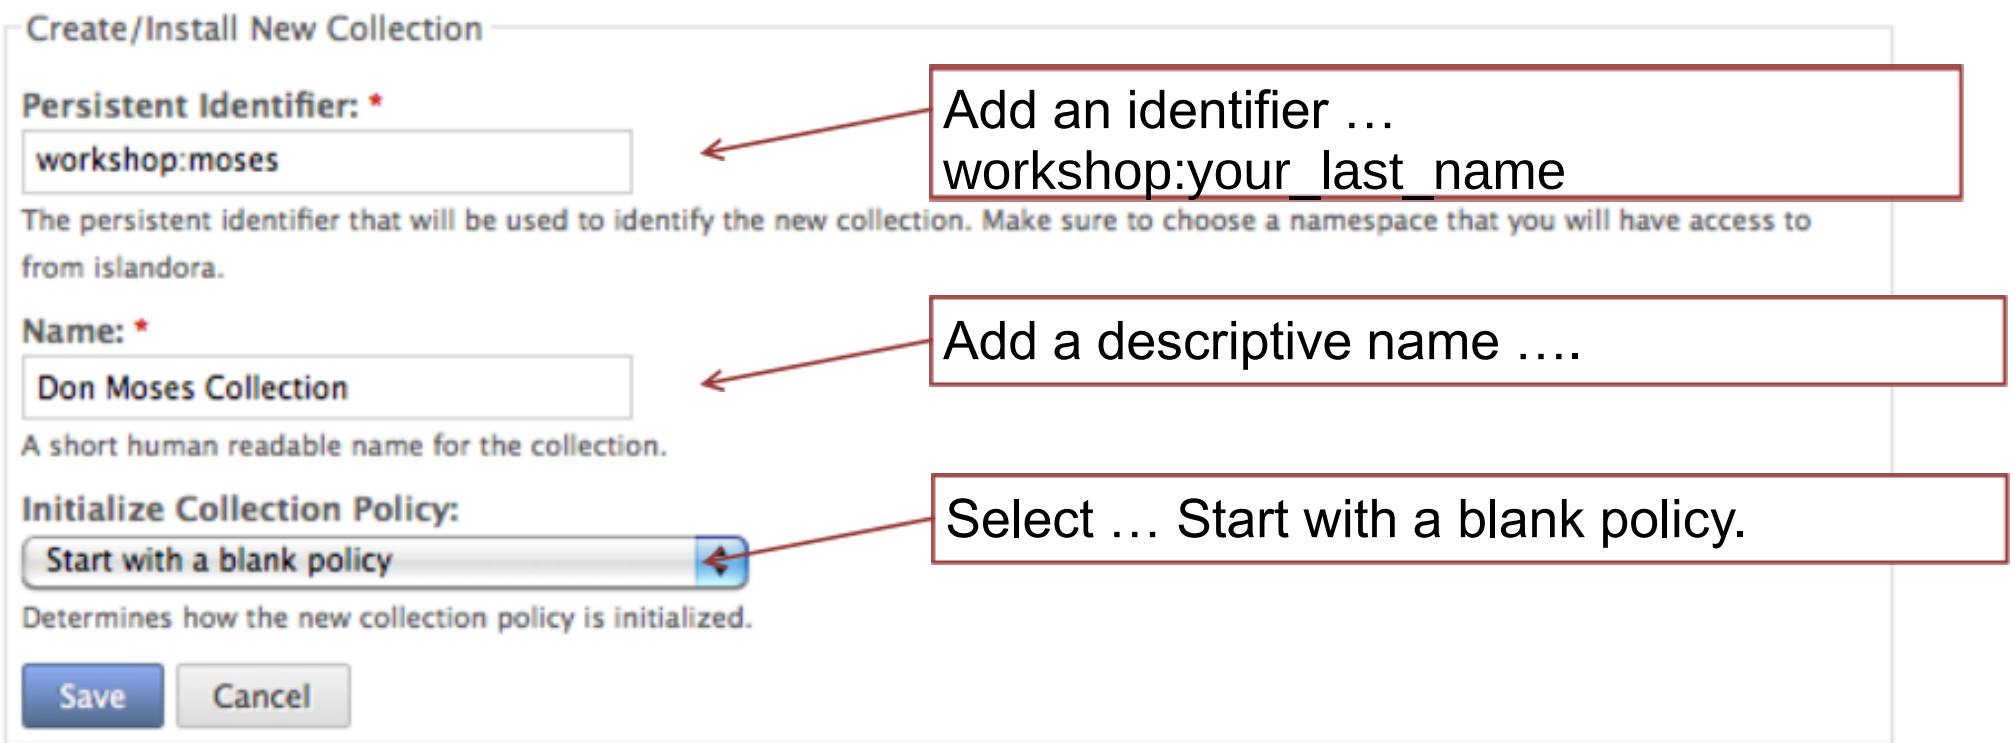
Select the islandora:workshop_collection

Adding a Child Collection – Step 1

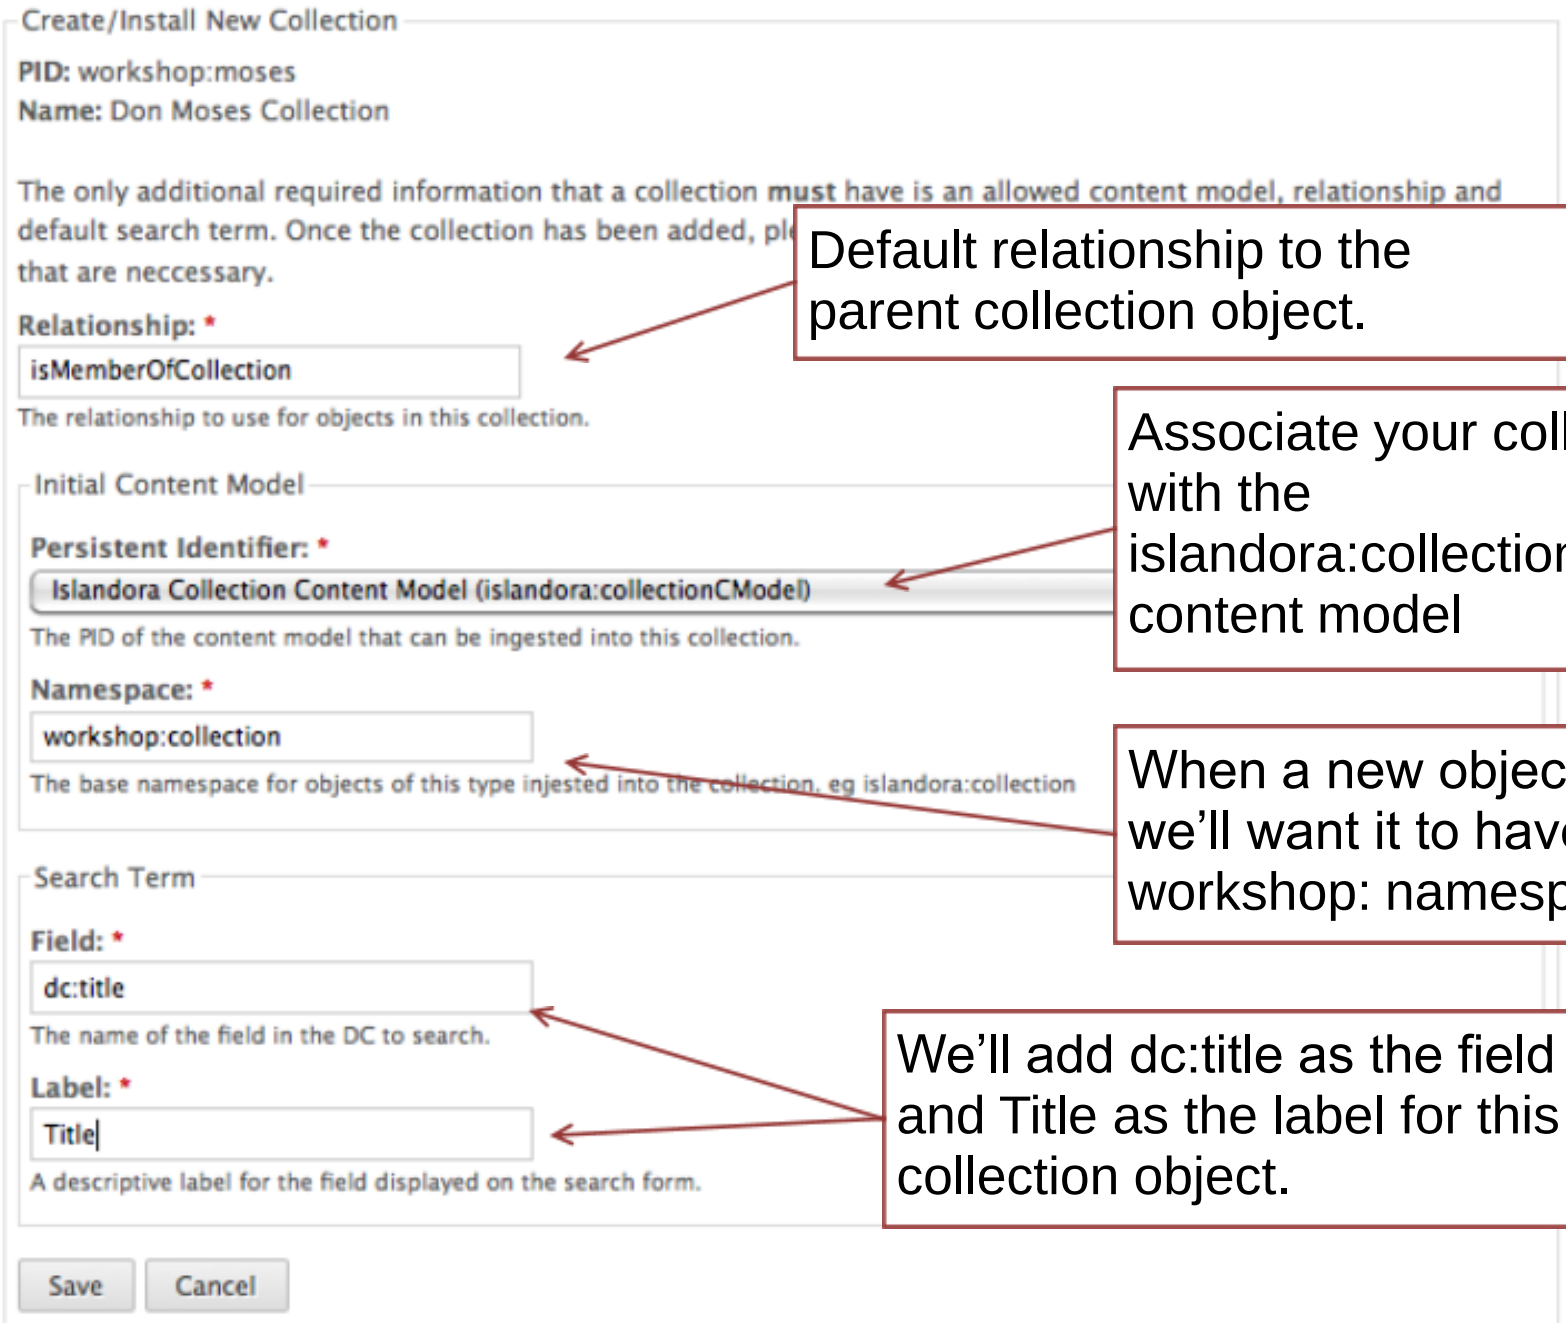


Adding a Collection – Step 2

After selecting the + to add a child collection, scroll to bottom and fill in the form.



Adding a Collection – Step 3



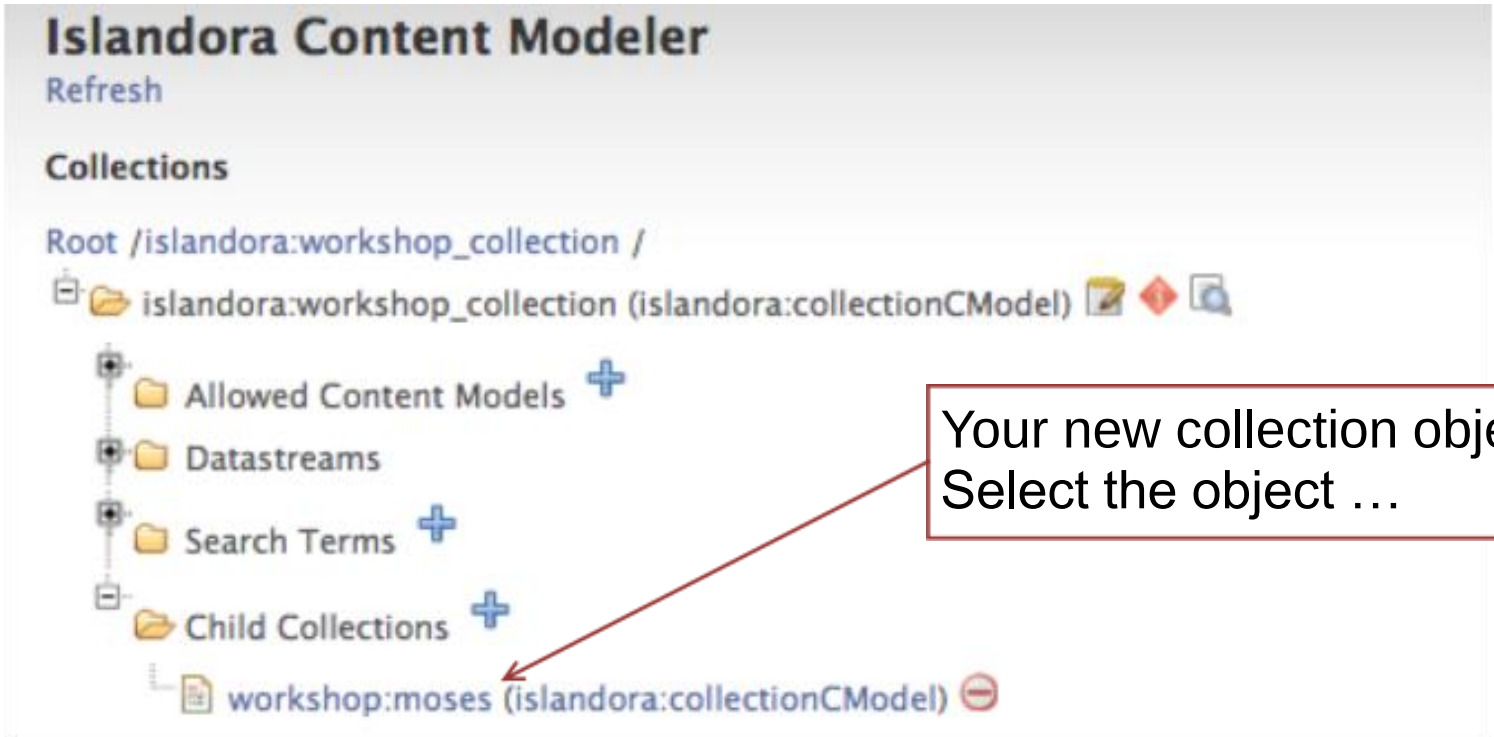
Default relationship to the parent collection object.

Associate your collection object with the islandora:collectionCModel content model

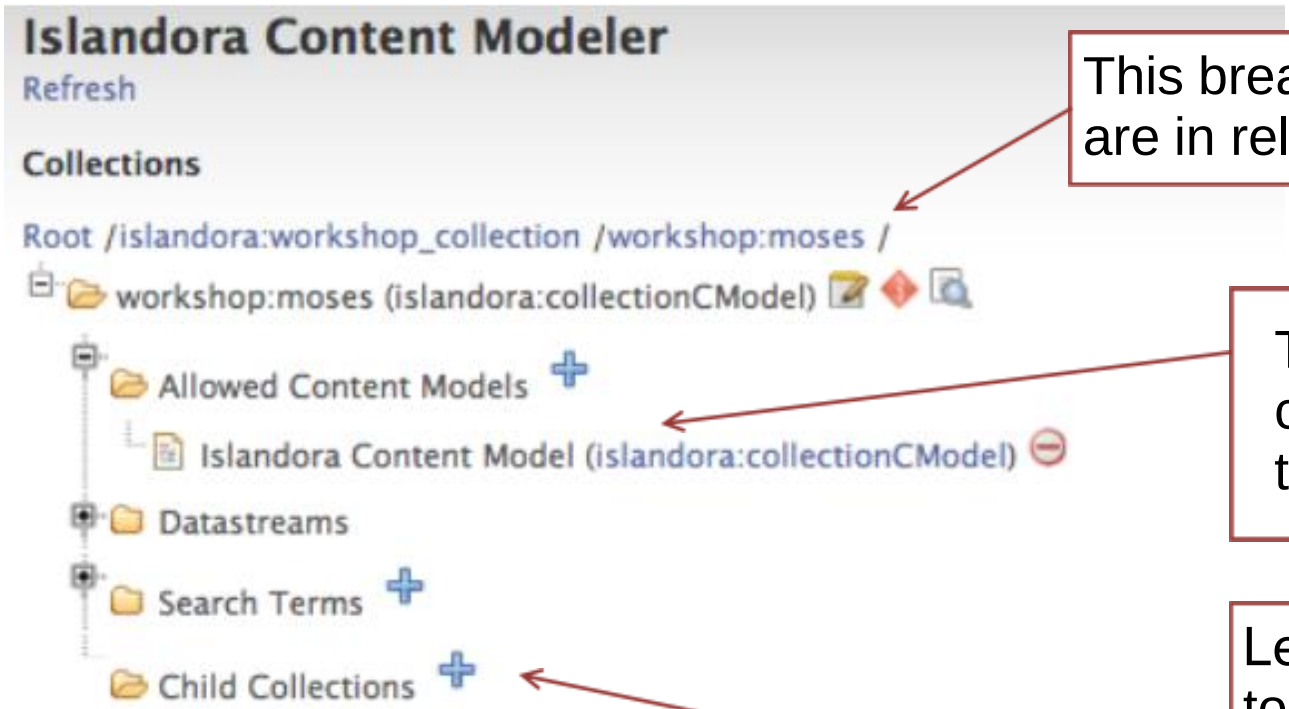
When a new object is added … we'll want it to have the workshop: namespace.

We'll add dc:title as the field and Title as the label for this collection object.

Adding a Collection – Step 4



Adding a Collection – Step 5



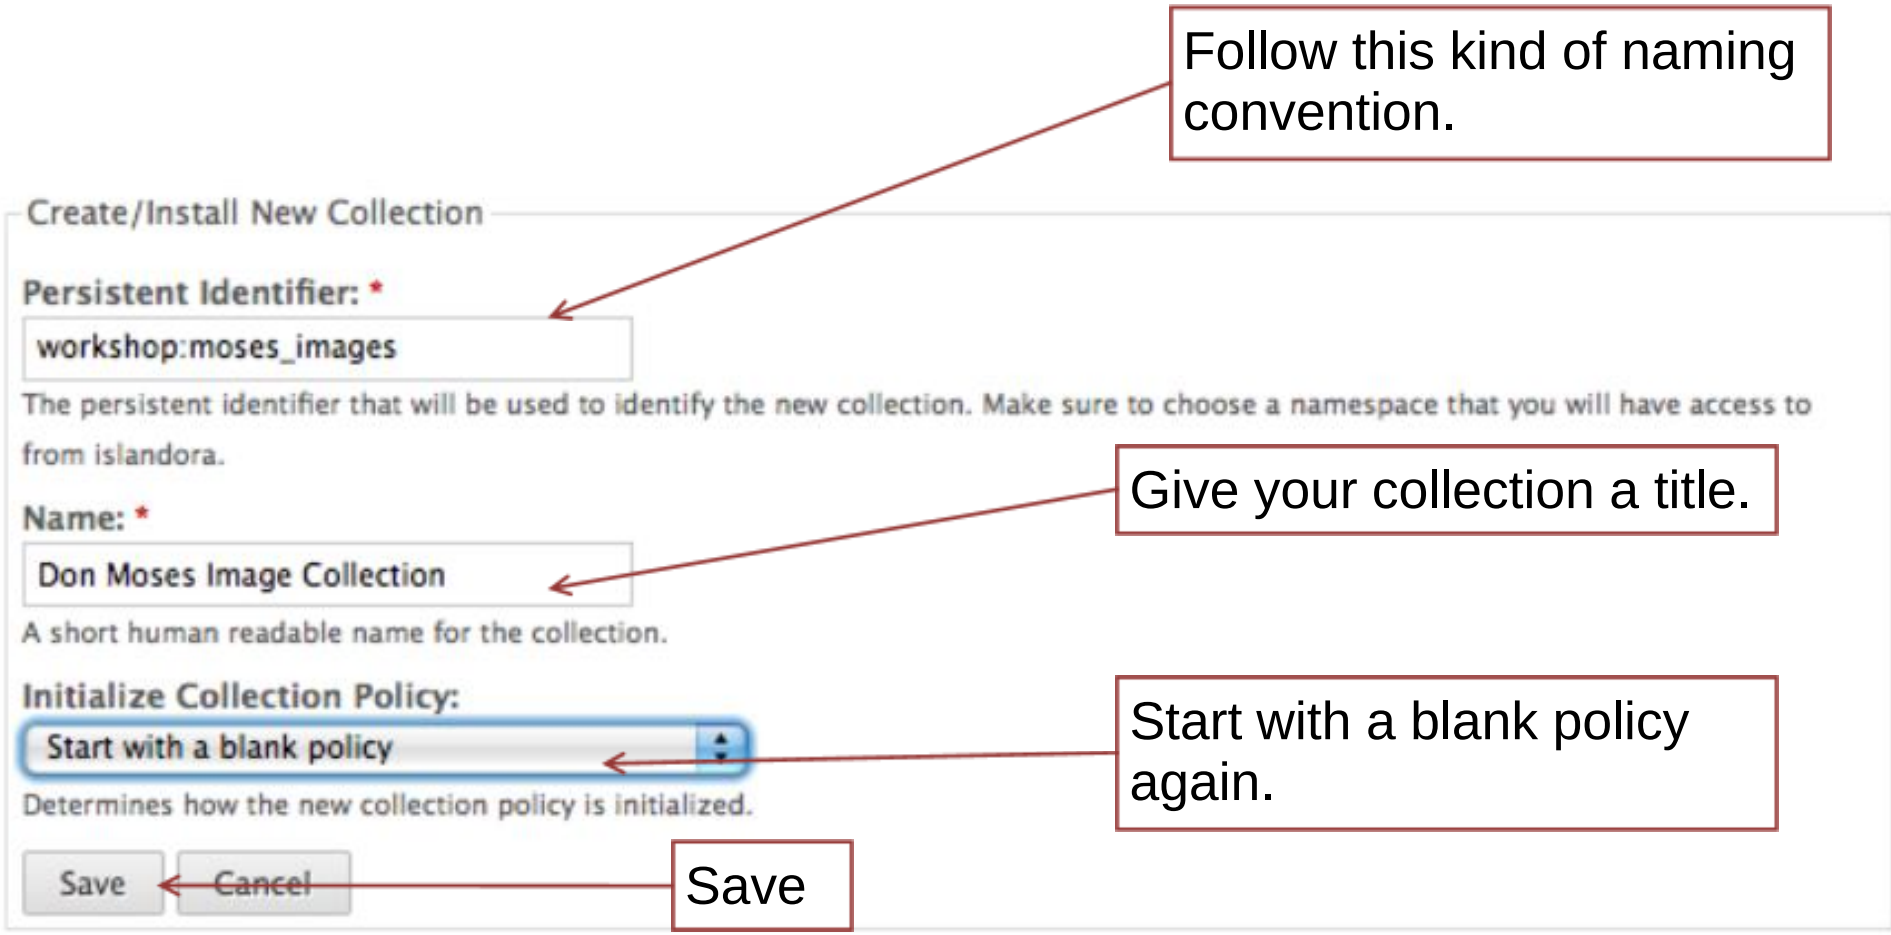
This breadcrumb tells you where you are in relation to the collection.

This collection object has a content model that allows it to add sub-collections.

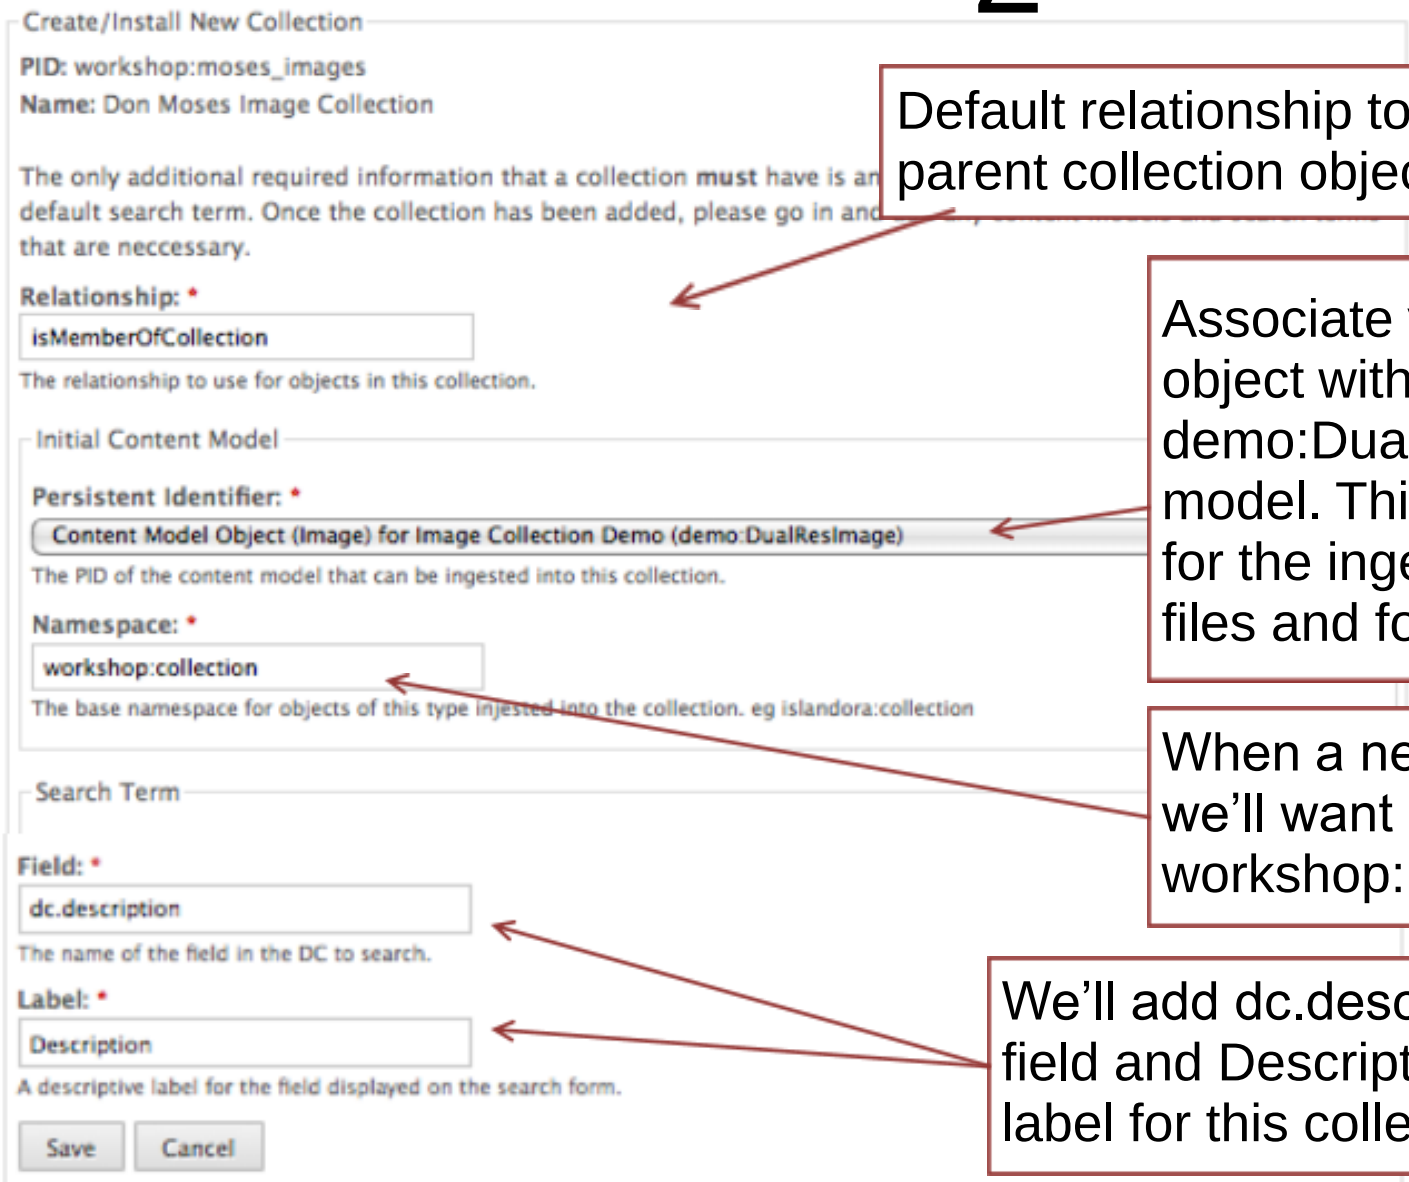
Let's add a sub-collection to your collection that supports images and / or PDFs. Select the + and scroll to the bottom of the screen …

Let’s add a Sub-Collection

Adding a Sub-Collection – Step 1



Adding a Sub-Collection – Step 2



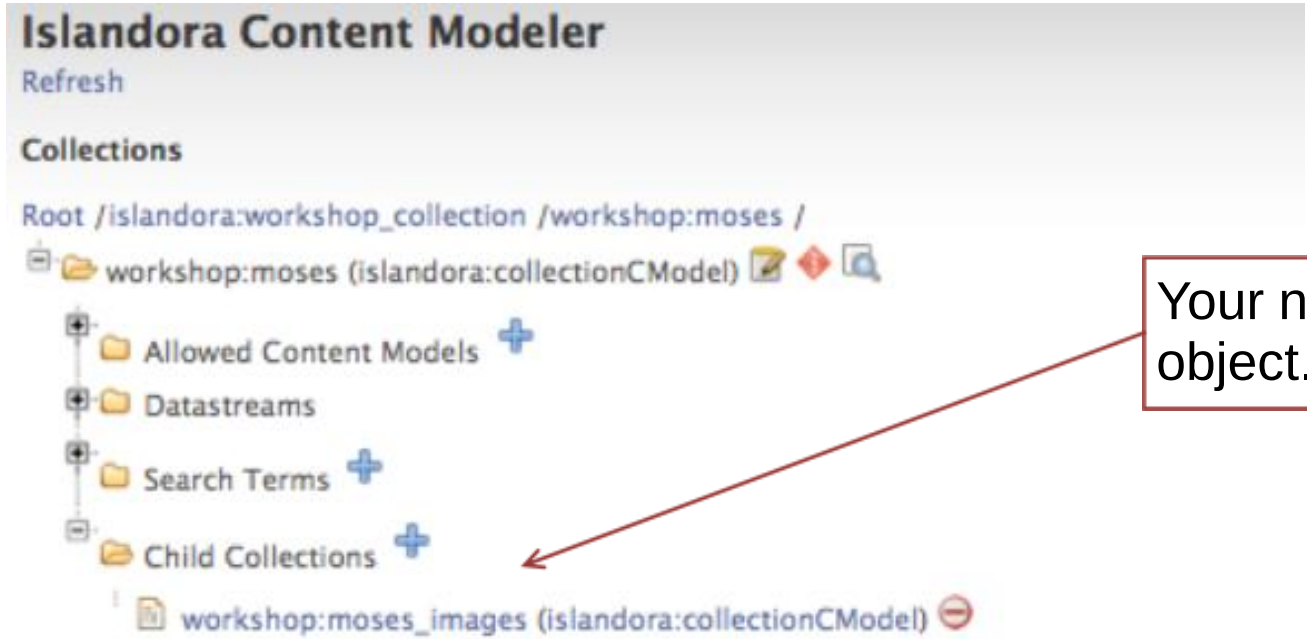
Default relationship to the parent collection object.

Associate your image collection object with the demo:DualResImage content model. This content model allows for the ingest of jpg, gif, and png files and for the display of same.

When a new object is added … we'll want it to have the workshop: namespace.

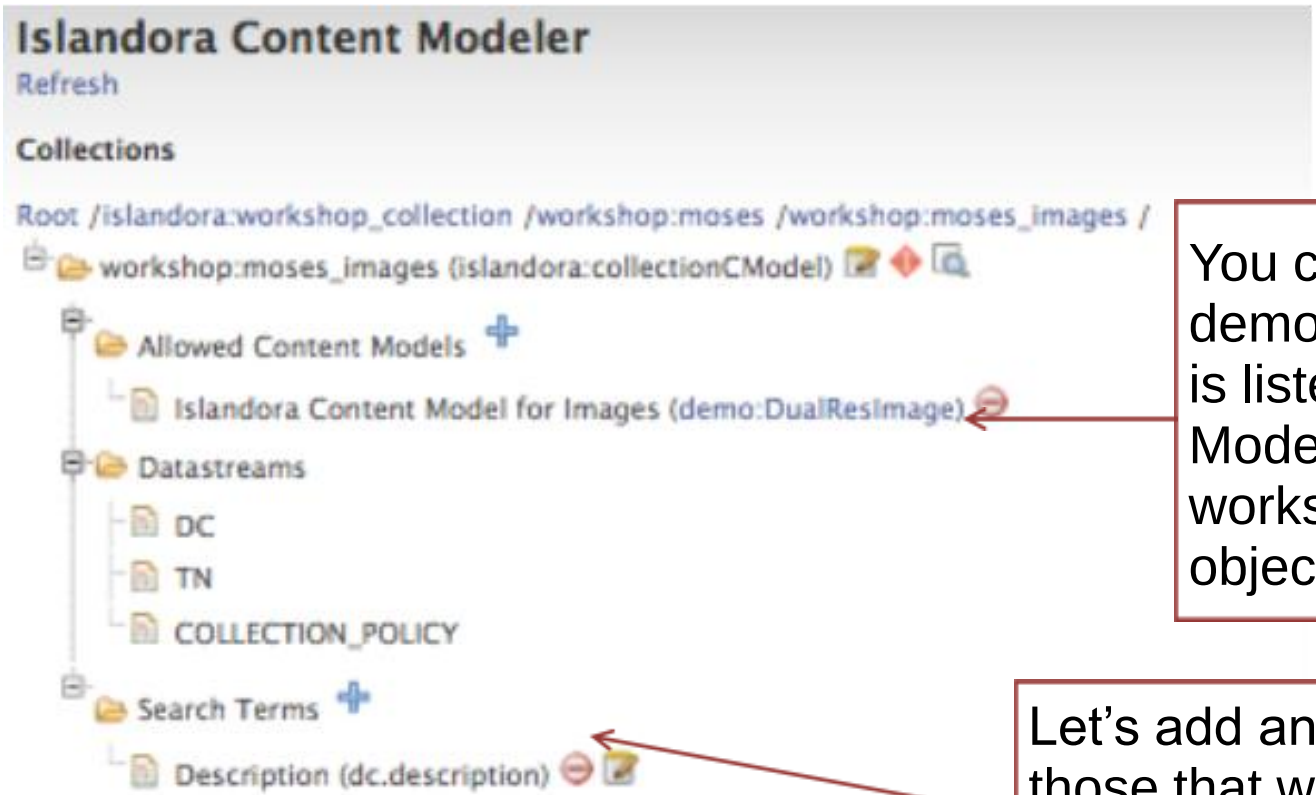
We'll add dc.description as the field and Description as the label for this collection object.

Adding a Sub-Collection – Step 3



Your new image collection object. Select it.

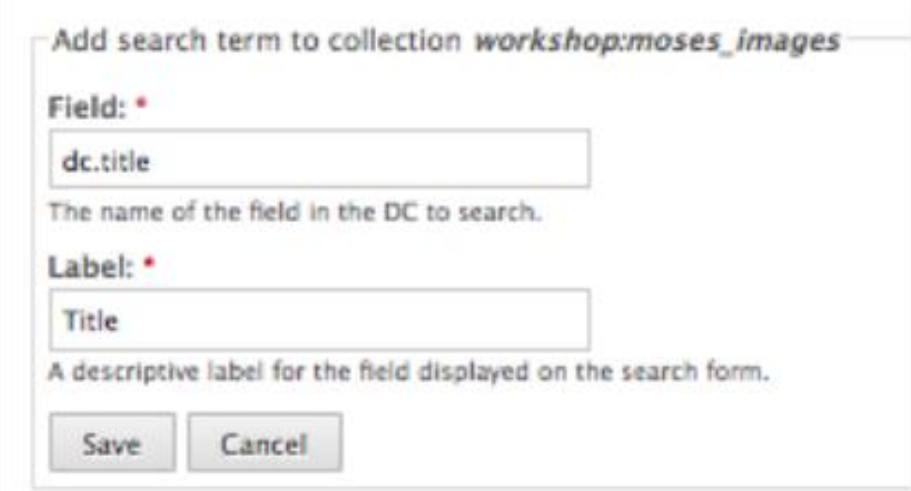
Adding a Sub-Collection – Step 4



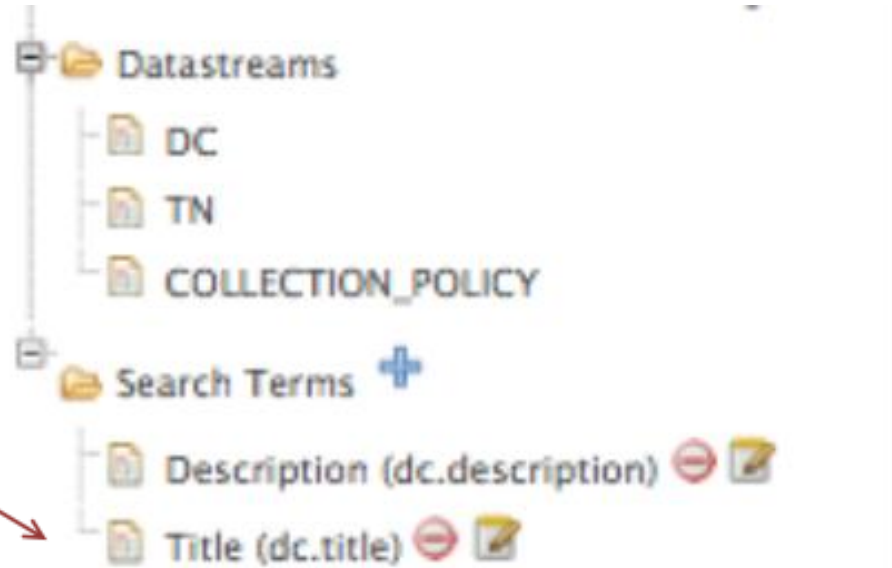
You can now see that the demo:DualResImage content model is listed as an Allowed Content Model for the workshop:moses_images collection object.

Let's add another search term to those that will be added to the search index. Click on the + to add another term and scroll to the bottom of the screen.

Adding a Sub-Collection – Step 5



Select Save … and Title has been added to the Search Terms for that collection.



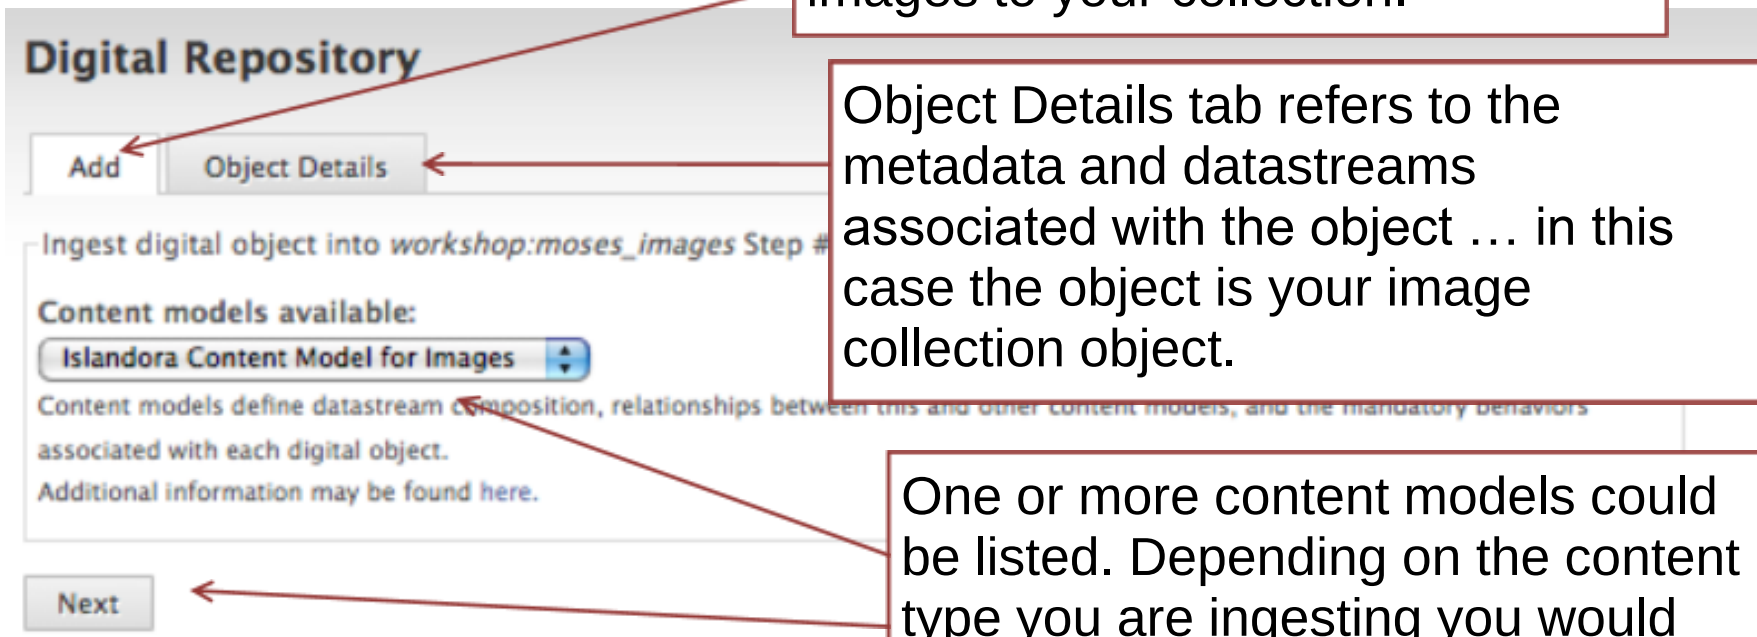
Managing Your Collection

Digital Repository **>** Workshop Collections
Find your folder and select it …

Select the sub-collection you created earlier.

Adding an image to your collection

We don't have any content in our collection yet so the default tab is Add.



Add tab allows you to add new images to your collection.

Object Details tab refers to the metadata and datastreams associated with the object … in this case the object is your image collection object.

One or more content models could be listed. Depending on the content type you are ingesting you would select the one that is appropriate. Then select **Next**.

Grab some sample image content
